Outreach Initiatives completed during period:

Stations participated in a Career Expo event at the Klamath County Fairgrounds in March of 2009 and supplied information regarding employment in the broadcast industry as well as information about employment availabilities within Stations.

Stations provide a “Jobs Available” link on their website at klamathradio.com to inform prospective employees of all jobs available at the station as well as open periods to submit resumes for future job openings.

Stations have an intern program available to help all local High School students and Oregon Institute of Technology students throughout the school year from September through May to help encourage interest in broadcasting.

Stations conduct tours of our broadcasting facilities for various local groups and organizations to encourage an interest in broadcasting and a future in broadcast employment.
